Ultimate Guide for Magento 2 Coupon List

In today's competitive e-commerce landscape, providing a seamless and engaging shopping experience is crucial for businesses to thrive. The Magento 2 Coupon List extension is a powerful tool that helps online retailers achieve this goal by strategically displaying a comprehensive Coupon List directly on the cart page and checkout page.

Key Benefits:

Increased Sales: By showcasing available coupons during the checkout process, the Magento 2 Coupon List extension encourages customers to utilize these offers, leading to an increase in sales and revenue.

Improved Customer Experience: The extension provides convenience and flexibility to both registered customers and guest users, allowing them to easily view and apply coupons during checkout. This enhances the overall shopping experience and fosters customer loyalty.

Customization and Flexibility: The extension offers the ability to Show or Hide the Coupon List, providing store owners with the flexibility to customize the checkout page according to their unique needs and preferences.

Seamless Integration: The Magento 2 Coupon List extension seamlessly integrates with your existing Magento store, ensuring a smooth and hassle-free implementation process.

Mobile Responsiveness: The extension is fully responsive, ensuring that the Coupon List is displayed correctly on all devices, including smartphones and tablets.

Easy Configuration: The extension is easy to configure and manage, allowing store owners to quickly set up and customize the Coupon List according to their requirements.

The Magento 2 Coupon List extension is a valuable asset for online retailers looking to boost sales, improve customer experience, and elevate their overall e-commerce strategy. With its

comprehensive features and seamless integration, the extension empowers businesses to provide a seamless and engaging shopping journey for their valued customers.

How to install the extension

1. Install via composer (recommend)

- Enable maintenance mode **php bin/magento maintenance:enable**
- Run the command **composer require mageinic/coupon-list**
- Run the command **php bin/magento module:enable MageINIC_Core MageINIC_CouponList**
- Run the command **php bin/magento setup:upgrade** to install the extension
- Run the command **php bin/magento cache:clean** to clean the cache
- Disable maintenance mode **php bin/magento maintenance:disable**
- Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.

2. Upload via ZIP/Archive

- Back up your store's database and web directory
- Download the extension zip file and extract the zip file
- Transfer the **MageINIC** folder to the Magento 2 **app/code/** directory on the server
- Enable maintenance mode **php bin/magento maintenance:enable**
- Run the command **php bin/magento module:enable MageINIC_Core MageINIC_CouponList**
- Run the command **php bin/magento setup:upgrade** to install the extension
- Run the command **php bin/magento cache:clean** to clean the cache
- Disable maintenance mode **php bin/magento maintenance:disable**
- Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.
